CAREER OBJECTIVE

Aspiring Java Backend Developer passionate about building scalable, production grade systems and delivering robust RESTful APIs. Eager to leverage strong problem solving skills and technical expertise in Spring Boot, JPA/Hibernate, and MySQL to contribute to innovative software solutions. Dedicated to writing clean, maintainable code, implementing best practices in MVC architecture, and collaborating with cross functional teams. Enthusiastic about learning new technologies and contributing to a fast growing technology company as an SDE 1.

EDUCATION

Siliguri Institute Of Technology, Siliguri

Information Technology ; CGPA: 8.5

Nov 2021 - Jul 2025

Siliguri, India

Siliguri Model High School, Siliguri, Darjeeling

Class XII, CBSE board

Mar 2019 - May 2020

Darjeeling, India

EXPERIENCE

Backend Developer Intern

Codesoft Limited

August 2023 - December 2023

Remote

- Constructed backend services for multiple client projects using Java 8 and Spring Boot framework.
- Gained expertise in RESTful API design patterns and enterprise-grade backend architecture during development.
- Utilized Spring Boot, Spring Data JPA, Hibernate, and MySQL to build scalable application backends.
- Engineered RESTful APIs for core business logic, including user authentication, entity management, and data operations, using JPA/Hibernate for optimized CRUD operations.

PROJECTS

Online Food Ordering System | Java, Spring Boot, MySQL, JWT, Hibernate

- Architected a scalable backend with modules for user management, menu catalogs, and order processing.
- Implemented JWT authentication and role-based access to secure RESTful API endpoints.
- Followed MVC architecture with robust exception handling to ensure consistent data responses.

Full-Stack Portfolio | React, Tailwind, Framer Motion, Spring Boot, MySQL, Linux

- Built a responsive portfolio using a Headless CMS architecture to manage data via Spring Boot REST APIs.
- Developed interactive UI features including a custom physics cursor and cinematic scroll animations.
- Enabled real-time project updates via authenticated cURL requests to a decoupled backend system.

ACHIEVEMENTS ACTIVITIES

- Solved 135+ problems on [LeetCode](#) — demonstrating strong proficiency in Data Structures & Algorithms and problem-solving skills.
- Implemented design patterns (Singleton, Factory, Strategy) in Java backend projects, applying OOP concepts, SOLID principles, and layered architecture.
- Contributed to open-source projects on GitHub — collaborating using Git workflows and Agile practices.
- Flexible to relocate across India; currently based in Bengaluru, Karnataka.

Technical Skills and Interests

Languages: Java 8+, SQL, HTML5, CSS3, Javascript

Frameworks & Tools: Spring Boot, Spring Data JPA, Hibernate, MySQL, H2, Postman, Maven, Git, Github

Core Skills: RESTful API Design, JWT Authentication, MVC Architecture, OOP, Data Structures & Algorithms, RDBMS, Agile/Scrum

Strengths: Problem-solving, Debugging, Team Collaboration, Technical Communication, Code Quality, Continuous Learning
